The ASPT’s patented α-Al₂O₃/SiO₂ hybrid dielectric dew point sensor is the world’s most advanced humidity sensor manufactured using the latest nanotechnology, featuring with long-term stability, fast response, and durability in extremely high/low humidity levels. It can be recovered even after exposure to liquid water! It can monitor both dew point and temperature with a temperature sensor provided. Proper use of the meter can provide lifelong reliability without recalibration. The superior performance of the sensor makes it an ideal choice for many industrial applications.

---

**Dew point range**
- -80 to +20°C dew point

**Output signal**
- Output signal: 4 to 20mA (typical)

**Specification**
- Supply voltage: 6V to 28V DC
- Accuracy: ±2 °C dew point (> -60°C DP)
- ±3 °C dew point (-80 to -60°C DP)
- Response Time (63% [90%] step change @3000 sccm): 15 s [45 s] (Step: -60°C to -20°C DP) 1 min [3 min] (Step: -20°C to -60°C DP)
- Operating temperature: 0 to +50°C
- Repeatability: 0.5°C dew point
- Operating pressure: 5MPa
- Pressure connection: G1/2” (Customized connection available)
- Housing material: Stainless steel
- Sensor protection: Stainless steel weaving filter with pore sizes < 8 μm
- EMC: According to IEC 61326-1
Wire connection
